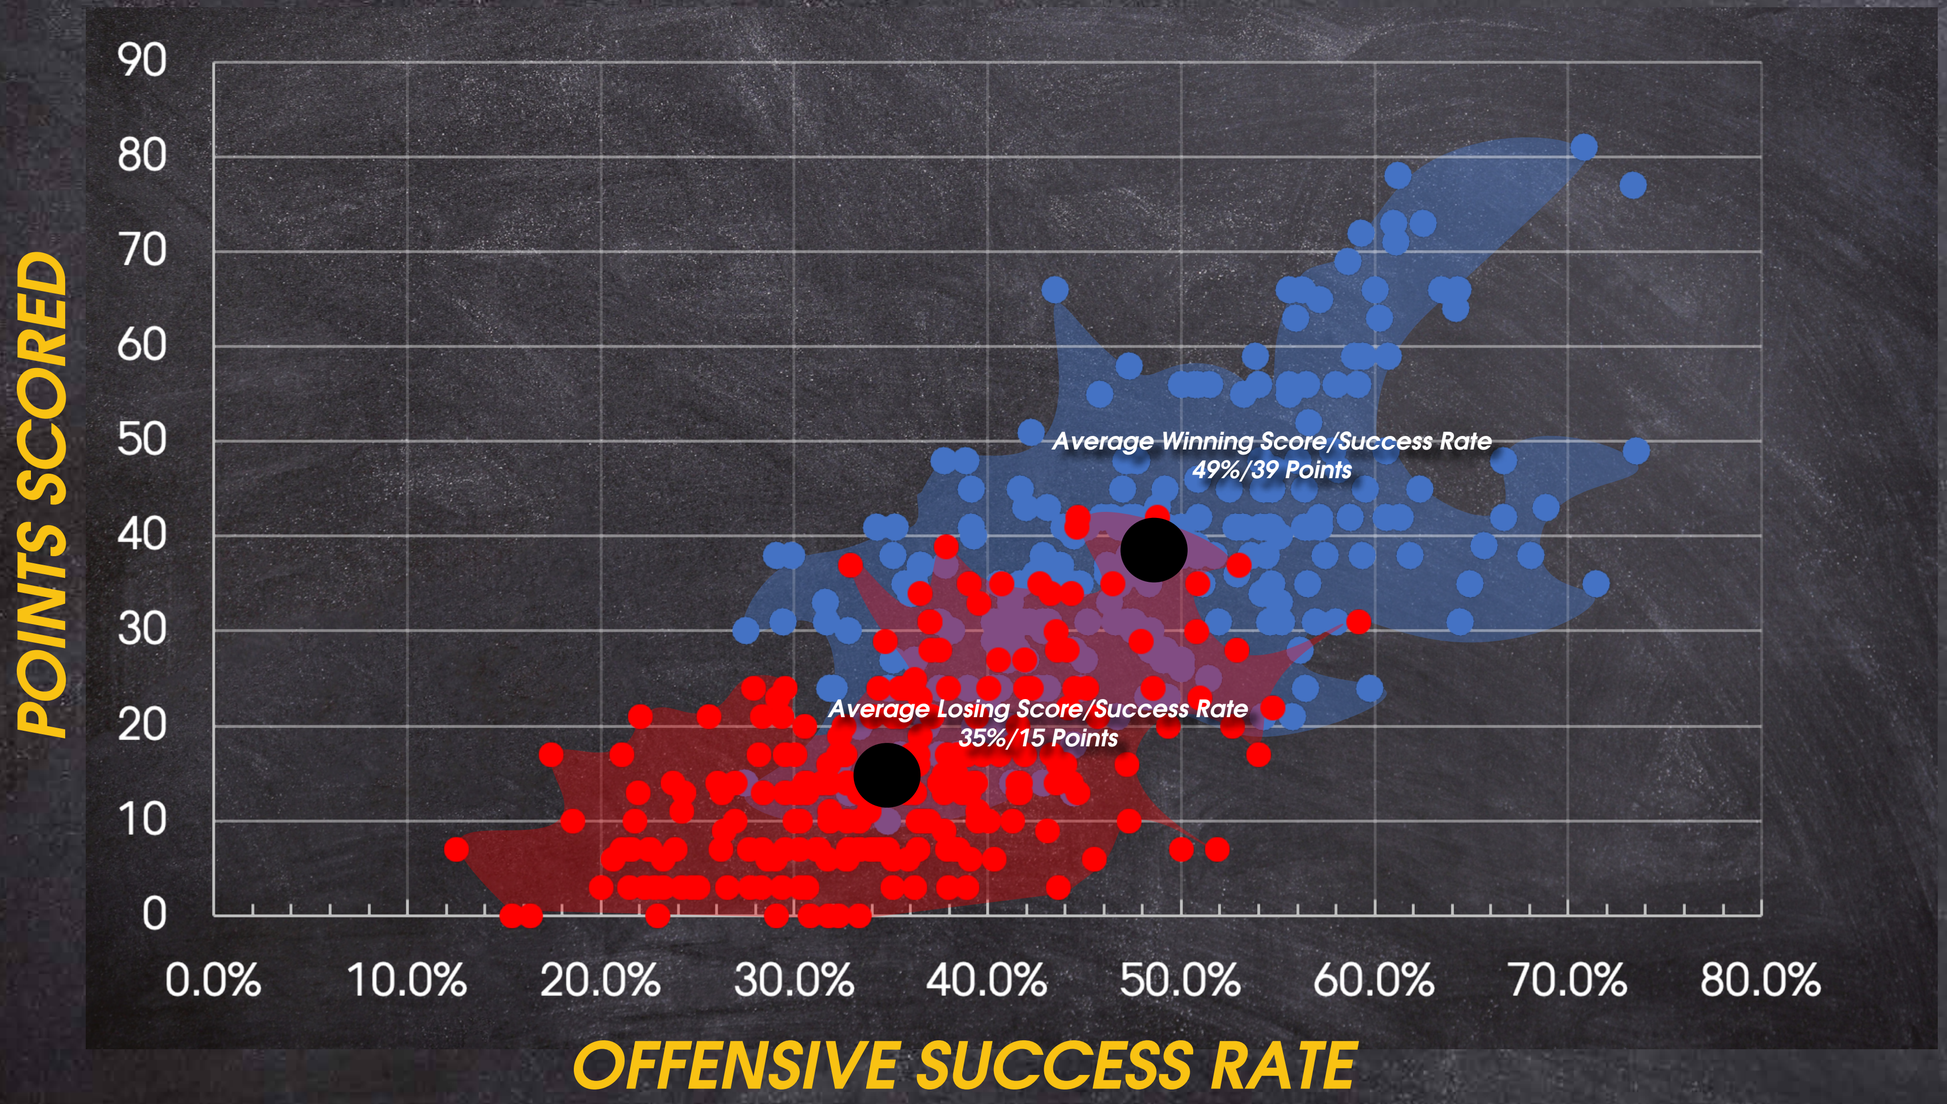
WEEK 3 PLOT POINTS: SUCCESS RATE/POINTS SCORED



Average Winning Score/Success Rate 49%/39 Points

Average Losing Score/Success Rate 35%/15 Points

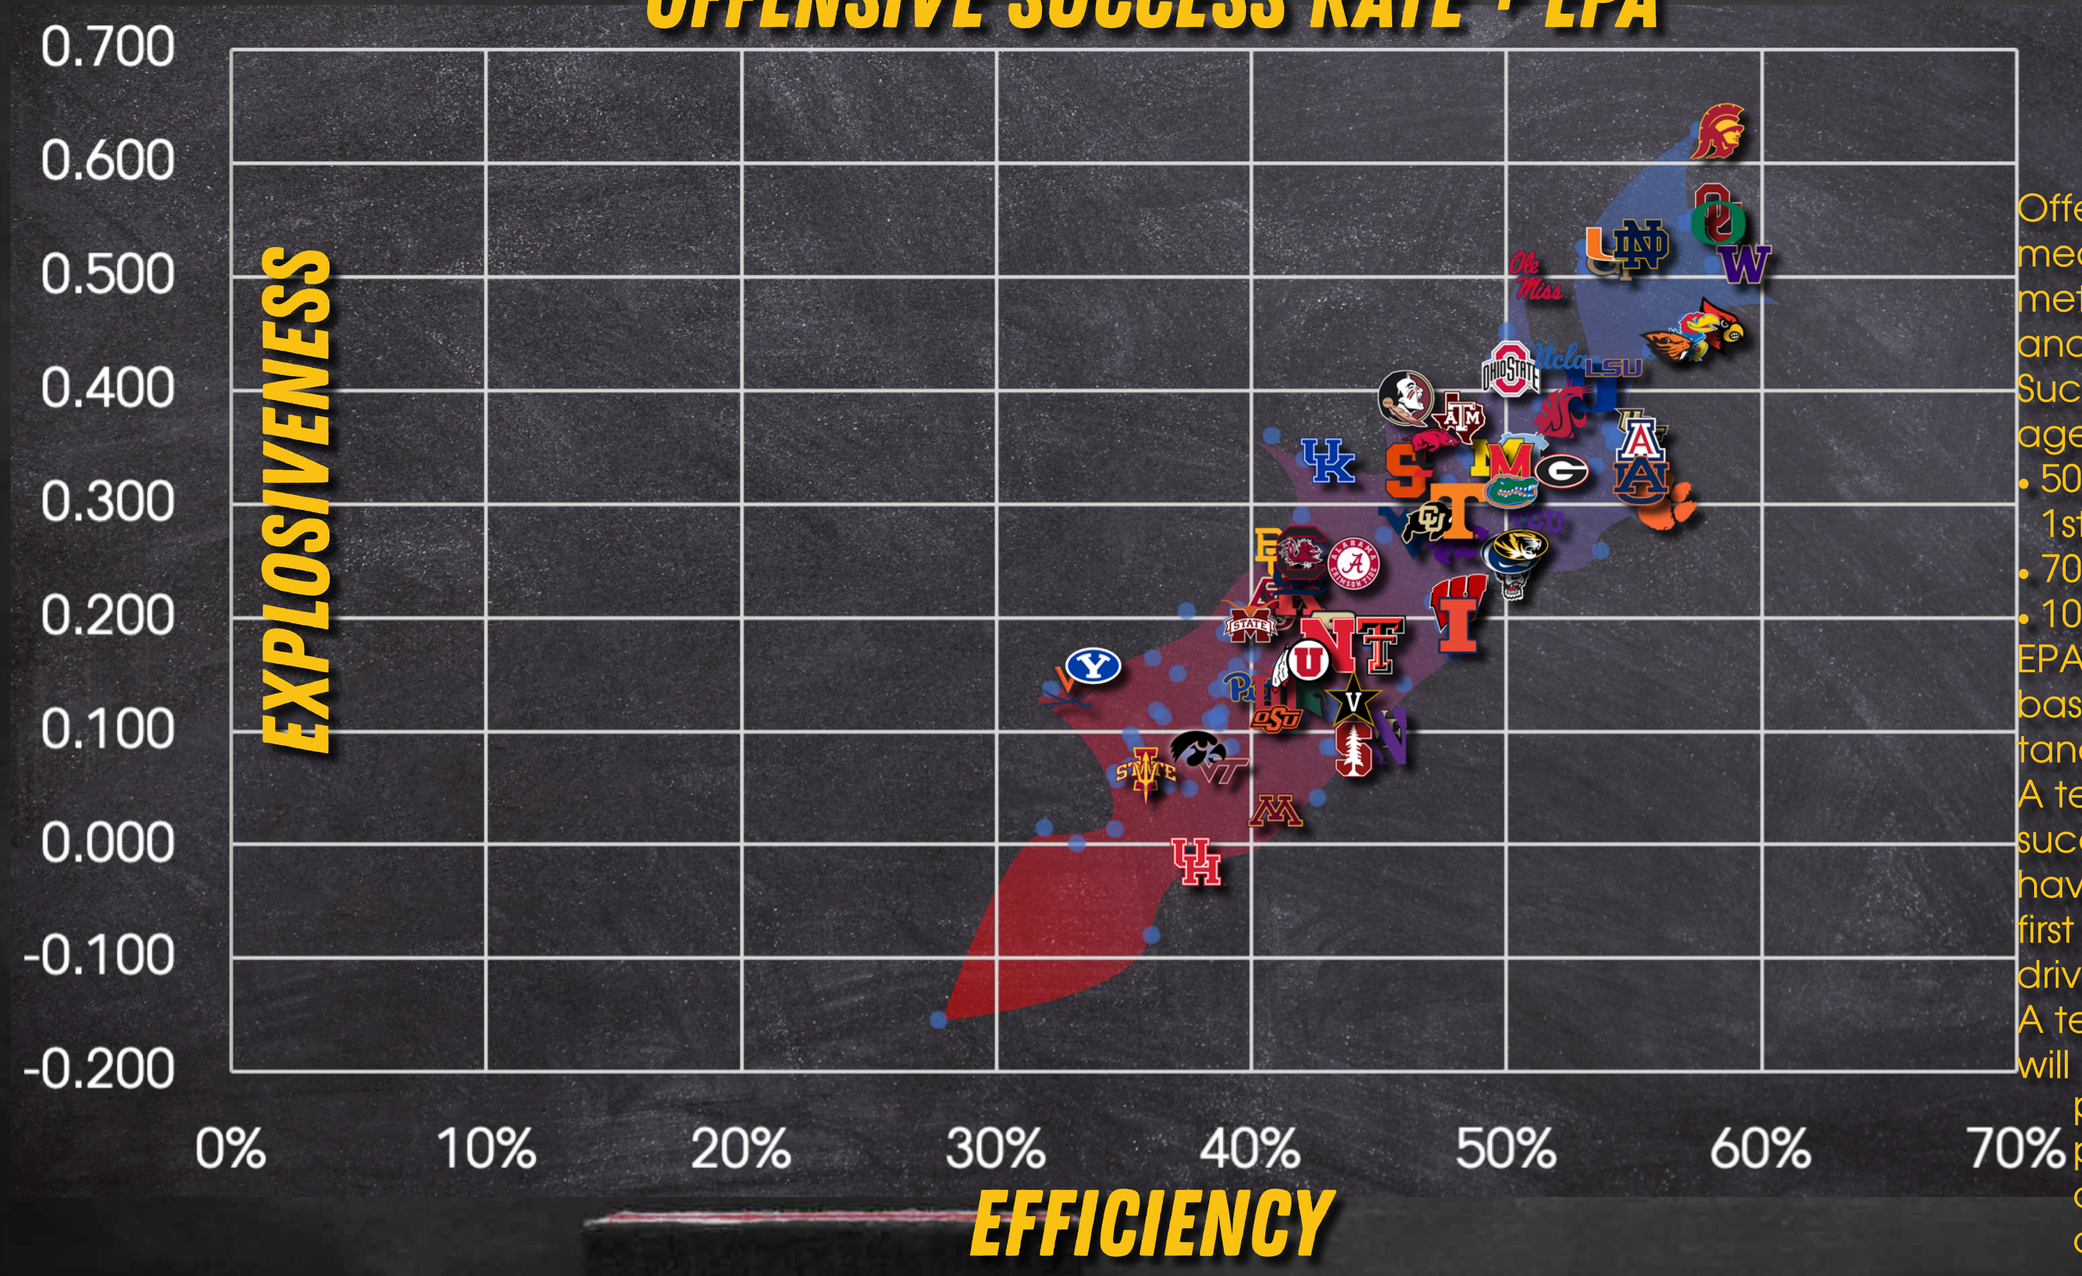
Net Success Rate averages didn't move. Teams who hold opposing teams to less than 40% success rate are 173-55 on the season.

Teams who have a 50% success rate or better are 101 -10 on the season.

Pac 12 Offenses are elite. Can experience to new QB teams catch up?

@DawgStats

OFFENSIVE SUCCESS RATE + EPA



Offensive Efficiency is measure by a few core metrics. Success Rate and EPA

Sucess Rate are percentage of plays which gain

- 50% of yards to gain on 1st
- 70% on 2nd
- 100% on 3rd and 4th

EPA values a play's result based on the down, distance, and field position.

A team with a higher success rate offense will have more plays, more first downs, and more drives.

A team with a higher EPA will have more explosive plays, a higher per play yardage, and more scoring opportunities.

DEFENSIVE SUCCESS RATE + EPA

Defensive Efficiency uses same metrics: Success Rate and EPA. But, they are calculated on what the defense ALLOWS to the opposing offense (lower is better for defense)

A team with a lower success rate offense will allow fewer plays, fewer first downs, and fewwr drives.

A team with a lower EPA will allow fewer explosive plays, a lower per play yardage, and fewer scoring opportunities.
